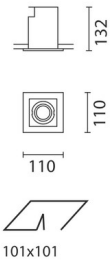
Deep Frame - Adjustable downlight 3x2,2W LED white

Product code:
2693

Technical description:
Recessed fitting designed for white LED light source 3x2,2 W that ensures a long life and requires very little maintenance. It is made up of a metal perimetric rim and a shaped sheet-steel structural housing. The adjustable optical assembly is made of die-cast aluminium and has joints with safety locks that make it possible to tilt the light source by ± 30° on the horizontal and vertical axes. It has been moved back from the installation surface for high visual comfort. No tools are needed for relamping. The fitting comes complete with a fixing system that permits fast installation with no tools into false ceilings with variable thickness 1 to 30 mm. The product comes complete with the lamp.



Installation:
Recessed installation into ceiling and wall by steel-wire springs. Preparation hole: 101 x 101 mm.

Dimension:
110x110mm H 132mm

Colour:
White (01)|Grey/Black (74)

Weight [Kg]:
0,4

Mounting:
Ceiling recessed|Wall recessed
