# SPIGOLO WALL CEILING

Studiocharlie

Floor, wall/ceiling, pendant and table lamps based on an extruded and tubular aluminium structure, connected with moulded polymer joints, with white or black painted finish. Thanks to the joints, enabling the profiles to house LED sources, one can rotate 360° in order to produce a directional direct or indirect lighting, screened by an opaline diffuser in polycarbonate. The floor version is designed as such to provide a virtual divider to ambiences, while the ceiling and wall versions allow the enlightenment of the ambience in a versatile and a comfortable way.
