

TECHNICAL DATA SHEET ART. S.7050N - POSTER

MODULES LED 4000K 230V 7680lm CRI 80
 Rated luminaire luminous flux: 4510lm
 Rated input power: 63W
 Luminaire efficacy: 72lm/W
 Electronic ballast 220÷240V 0/50/60Hz

CE □ ◆ ▲ ▲ IP 65 A A+ A++

PRODUCT TYPE

Post top luminaire. IP rating IP 65

MATERIAL CHARACTERISTICS

Aluminium die cast housing in EN AB-47100 (low copper content) and extruded EN AW-6060 with high resistance against corrosion. Stone wash surface treatment prior to painting process. A4 grade Stainless Steel screws with 2,5-3% molybdenum content which increases the resistance against corrosion. Silicone gaskets. Painting Process : 3 Step Process

1) Surface treatment with BONDERITE. A heavy metal free chemical surface treatment containing ceramic nano particles giving a cohesive, inorganic and highly dense protective coating. 2) PRE POLYMERIZATION a process of introducing an epoxy primer with excellent characteristics to the paint which also offers very high resistance to oxidation due to its Zinc content. 3) POLYMERIZATION a process with the application of polyester powder with high resistance against UV rays and harsh weather conditions. Resistance test protection for Marine applications for 1200h. Mechanical resistance IK 07

LIGHTING PERFORMANCE

Toughened glass 6 mm thick. LOR --

POLE CONNECTION

Pole head in painted aluminium with Ø 76 mm (POSTER) connection or Ø 60 mm (MINIPOSTER).

WIRING

Luminaire suitable for single cable gland. Isolation: CLASS II . Available colours: Aluminium grey (cod.14), Anthracite grey (cod.24). Weight: 1.7 Kg Glow Wire test: -- Exposed windage area : 0,14 m²

Lamp included.

POSTER REGISTERED DESIGN

This luminaire contains built-in LED modules with energy class: A, A+, A++. In case of damage or malfunction please contact the manufacturer to receive additional instructions on how to replace and relative spare parts to order. The LED modules cannot be handled in the luminaire by the end user (Regulation UE 874/2012).

LED circuit boards are engineered accordingly to actual Lumen Maintenance regulation (LM80) and Technical Memorandum (TM21) where uniformity and quality of light is 50.000 hours referred to L70 B20 Ta 25°C.

Lifecycle refers to LED circuit boards only, all others components of the luminaire are excluded.

TECHNICAL DATA SHEET ART. S.7050N - POSTER ACCESSORIES

S.2812
Ø 76 mm CYLINDRICAL POLE TO BE BURIED
 Cylindrical shaped poles consisting of: straight circular section shaft, Ø 76mm, 3mm in thickness, total length 3,50m, single section built by using longitudinally welded tubes by induction welding (ERW) UNI EN 10219-2-ISO 4200

Suitable for ground recessed installation to a cement base 0,50m: Suggested reinforced concrete footstall dimension 1m x1m h 0,7m. Footstall dimension can be calculated according to your country norms and ground properties.

The grade of steel used is S235JR (Fe360B) with material characteristics as per normative UNI EN 10025; Painting Process: PRE POLYMERIZATION a process of introducing an epoxy primer with excellent characteristics to the paint which also offers very high resistance to oxidation due to its Zinc content. POLYMERIZATION a process with the application of polyester powder with high resistance against UV rays and harsh weather conditions. Resistance test protection for Marine applications for 1500h.

Including inspection door, terminal cable block and fuse.

S.2813
Ø 76mm CYLINDRICAL POLE WITH BASE
 Cylindrical shaped poles consisting of: straight circular section shaft, Ø 76mm, 3mm in thickness, total length 3,00m , single section built by using longitudinally welded tubes by induction welding (ERW) UNI EN 10219-2-ISO 4200

Suitable for installation to a planted root flange through a base plate 250mm x250mm x12mm in steel S355JO : Suggested reinforced concrete footstall dimension 1m x 1m h 0,7m. Footstall dimension can be calculated according to your country norms and ground properties.

The grade of steel used is S235JR (Fe360B) with material characteristics as per normative UNI EN 10025; The surface protection treatment is done through hot dip galvanization.

Painting Process: PRE POLYMERIZATION a process of introducing an epoxy primer with excellent characteristics to the paint which also offers very high resistance to oxidation due to its Zinc content. POLYMERIZATION a process with the application of polyester powder with high resistance against UV rays and harsh weather conditions. Resistance test protection for Marine applications for 1500h.

Including inspection door, terminal cable block and fuse.

TO BE USED WITH THE FOLLOWING ACCESSORIES:
 S.2849 PLANTED ROOT for CYLINDRICAL POLE

S.2849
PLANTED ROOT for CYLINDRICAL POLE
 C= 200mm, D=200mm E=Ø80mm, h=407mm, h1=90mm and bolts in galvanized steel with M16 threads. Suggested reinforced concrete footstall dimension **: A = 0.7 m B = 0.7 m

**Footstall dimension can be calculated according to your country norms and ground properties.

TO BE USED WITH THE FOLLOWING ACCESSORIES:
 S.2800, S.2801, S.2812, S.2813, S.2843, S.2845
 CYLINDRICAL POLE

S.7059
ASYMMETRIC SHIELD
 Aluminium shield to be mounted when an asymmetric light distribution is required from the POSTER pole top. Colours: Aluminium grey (code 14) Anthracite grey (code 24)
