Consisting of two downlights, one surface-mounted downlight, a 3-circuit system spot and a pendant lamp our lighting series Supros convinces by versatility, outstanding LED technology and a harmonious design. With its very high luminous flux the product family Supros is ideally suited for the exchange of high-powered, conventional lighting systems. The integrated and wide flooding reflector can be exchanged with separately available reflectors with smaller beam angles without the use of any tools. Thanks to the incorporated LED drivers, all fittings of this series are suitable for direct connection to 230V mains supply. This luminaire contains built-in LED lamps. EEK: A - A++. The lamps cannot be changed in the luminaire.
