Wall luminaire of our BIG THEO series made from aluminum and a glass covering the bulb. Thanks to the position of the two incorporated lampholders, the fitting creates two equal light beams running in opposite directions (up / down). Available in different colour versions, the electrical connection is made directly to 230V mains supply. The BIG THEO series also includes alternative wall and ceiling luminaires with different types of lampholders. This luminaire is compatible with bulbs of the energy classes: E - A++
