The high-voltage wall luminaire SAINT 22 is made from high-quality materials, ensuring homogeneous illumination of the used T8 ring tube. Nevertheless, the conscious perception of the ring tubes is part of the lighting concept. A smaller and round cover from chromed steel sets a pleasant contrast. Thanks to the already incorporated electronic ballast, SAINT 22 is ready for direct connection to 230V mains supply. This luminaire is compatible with bulbs of the energy classes: A - A
