The aluminium-made wall luminaire ROX PRO convinces with its very simple installation by means of the integrated plug system between canopy and housing. By the position of the two installed lampholders, the fitting produces two equal but oppositely arranged light beams (UP/DOWN). Available in different colour versions, the electrical connection of ROX PRO is made directly to 230V mains supply via the incorporated ballast. Rated IP44, the fitting is suitable for outdoor use. This luminaire is compatible with bulbs of the energy classes: A - A+
