Round wall and ceiling luminaire DRAGAN GRID made from aluminium and rated IP44, making it suitable for outdoor use. The satined PC surface of the double-headed fitting is protected by an even-coloured grid. It is generating a corona effect to the rear of the fitting through a small, ring-shaped part. Thanks to the incorporated ballast, the electrical connection is made directly to 230V mains supply. This luminaire is compatible with bulbs of the energy classes: B - B
