A rigid 24V DC LED RGB profile made from anodized aluminium and plastic. We included a connection lead, a flexible connector and mounting clips. Through the build-in plug-contacts these profiles can be connected directly to each other. The power-input to these profiles, available in several lengths, is made via a separately available 24V direct current power supply. To control the RGB-effects a controller is required and available on accessory. This luminaire contains built-in LED lamps. EEK: A - A++. The lamps cannot be changed in the luminaire.
