Flange -

Product code:

1040

Technical description:

The flange is used to connect the brackets to the pole. It is made of G Al Si UNI 5076 die cast aluminium. It supports one bracket in die cast aluminium. Epoxy powder painting with orange peel finish. The flange houses the wiring cables and a hooking element to prevent accidental rotation on the brackets. Earth continuity between bracket-flange-pole is provided by two M6x20 mm UNI 5931 stainless steel screws with underhead spring in order to prevent accidental loosening.

Installation:

Fixed to the pole with socket head screws.

Dimension:

135x270 mm

Colour:

Grey (15)|Black (04)

Weight [Kg]:

0

Notes:

The available part for the flange installation onto pole code 1207 is between 5 and 7 m in height.
