Tapered steel poles for burial in ground diam. 89-60 mm h 4000 mm**Attention! Code out of production****Product code:**

1210

Technical description:

Tapered pole made of steel by means of roller levelling and welding process, 70 micron hot galvanised in compliance with UNI 5744-66 regulations. The cross-section and the thickness of the pole conform to the homologation specifications as set by the European regulations UNI EN 40.

Installation:

Buried in ground for 500 mm.

Dimension:

D 89-60 mm

Colour:

Black (04)|Grey (15)

Wiring:

The inspection lid is made of die-cast aluminium and located at 1500 mm from the pole base. Dimensions are 186x45 mm. The power supply cable enters the pole through a 60x40 mm slot located on the pole at 750 mm from the base. The earthing connection for the pole is made through an M8X17 mm tropicalised steel insert in the part of the pole that emerges from the ground.
