Baffle for globes with lamps placed upwards**Product code:**

1580

Technical description:

Superpure aluminium baffle with symmetrical optics for globes with lamps placed upwards. Made up of a cover that shields the electrical components and supports 6 flaps designed to screen the light source and act as reflecting elements. The cover base houses two slots in diametral position for bayonet connection with the screws provided in the gallery.

Dimension:

D=170mm H =280mm

Colour:

Aluminium (12)
