Gabbiano - Floodlight with electronic transformer and dimmer 100 W 12 V QR 111**Attention! Code out of production - 2012****Product code:**

2711

Technical description:

Spotlight for interior lighting made up of a cradle in thermoplastic material reinforced with high-solidity fiber glass, an optical assembly inside the cradle, a die-cast aluminium lampholder cover plate and lamp-support ring, a mechanical locking device to guarantee stability of the optical assembly at one end of the cradle. The technopolimer transformer compartment is joined to the adapter. IP40 for optical assembly with optional glass diffusers.

Installation:

Floodlight to be installed on electrified track by a three-phase adapter. The adapter has an adjustable friction device for a vertical application.

Dimension:

103x266mm

Colour:

White (01)|Grey (15)

Mounting:

Three circuit track

Wiring:

Electronic transformer (complete with dimmer for the adjustment of the luminous intensity) improves the aesthetics of the track-mounted spotlights. It also guarantees protection against spikes up to 1000V (while standards require up to 500V), a Soft Start mechanism increasing the life of the light source and a patented thermal system protecting the transformer and the fixture from overloads.

Notes:

For the photometric data of the fitting refer to the photometric characteristics of the light source.

Complies with EN605981 and pertinent regulations
