Radial - Down light luminaire with electronic control gear HIT-DE 150W**Product code:**

3028

Technical description:

Suspended fitting designed to use metal-halide lamp with down-light emission. The optical assembly and ceiling-mounted power-supply rose are made of cast aluminium subjected to phosphochromate treatment and finished with liquid acrylic paint with high UV resistance. The superpure-aluminium symmetric reflector for diffused light is equipped with a screen that ensures an antiglare angle of 40°. The lower transparent hardened soda-lime glass is housed in the assembly with no visible screws. The suspension system supplied with the product is made up of three steel cables L = 4200 mm with millimetric adjustment devices included in the rose supports. External black power-supply cable.

Installation:

Suspended installation - the base is fixed to the ceiling by means of Fischer screws.

Dimension:

D 320 mm h 100 mm

Colour:

Grey (15)

Mounting:

Ceiling pendant

Wiring:

The electronic control gear components and the standard terminal board for mains connection are housed in the ceiling-mounted rose.

Notes:

Complete with suspension cables L=4200 mm, base and power supply cable.

Complies with EN605981 and pertinent regulations
