IGZSistema Comfort FL - Recessed fitting complete with analog dimmable electronic (1-10V) control gear 18 W TC-DEL
Attention! Code out of production

Product code:

3578

Technical description:

Recessed fitting designed to use compact fluorescent lamps. The optical assembly is made of self-extinguishing thermoplastic material. The painted steel top plate acts as a heat dissipater, consequently optimising performance levels and ensuring outputs of up to 80%. The optical assembly is designed for installation in public environments and features surfaces made with inflammable materials. The fitting is installed by means of special fastening springs, which guarantee excellent anchoring to false ceilings ranging from 1 to 25 mm in thickness. The component-holding box is already wired and fitted with a luminous element.

Installation:

Recessed with 212-mm diameter holes.

Dimension:

D= 232 mm h= 150 mm

Colour:

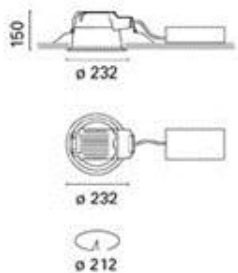

White/Aluminium (39)

Mounting:

Ceiling recessed

Wiring:

Analog dimmable electronic (1-10V) control gear.

Complies with EN605981 and pertinent regulations
