**Trimmer - Single-assembly square model 1x75W QR 111**

**Product code:**  
4606

**Technical description:**

Luminaire designed for use with superspot low-voltage 1x75W halogen lamps QR111. It is made up of a perimetric painted sheet-steel rim and a sheet-steel optical assembly painted in black. The diecast aluminium optical assembly can be extracted from the luminaire body through a special slide and a fork supporting the lamp-holding ring. The slide is fixed to a device which rotates around the vertical axis and permits a maximum 355° rotation. A cylindrical hinge in the lower end of the bracket permits a 75° inclination on the vertical plane and the block of the movement by tightening the screws.

**Installation:**

Recessed fixing into false ceilings.

**Dimension:**

198x198mm H 235mm

**Colour:**

White (01)|Grey (15)

**Weight [Kg]:**

2,1

**Mounting:**

Ceiling recessed

**Wiring:**

Connection to the secondary of the transformer, supplied separately, for low-voltage lamps.

**Notes:**

For the photometric data of the fitting refer to the photometric data of the light sources used.

Complies with EN605981 and pertinent regulations
