## IGZParallel spot square - Projector with dimmable electronic transformer 50/100 W QT12 Spot

Attention! Code out of production

### Product code:

4800

### Technical description:

Die-cast aluminium projector with adapter. The optical assembly is separate from the components assembly in order to guarantee optimum operating conditions and efficiency. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis.

### Installation:

Electrified track application through special adapter complete with concealed dimmable electronic transformer.

### Dimension:

470x193 mm

### Colour:

White (01)|Grey/Black (74)

### Weight [Kg]:

0,8

### Mounting:

Three circuit track

### Wiring:

Complete with 50W 230V +/-10% dimmable electronic transformer with 50/60 Hz mains frequency.

### Notes:

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
