Parallel - Projector with electronic control gear 35 W HIT (CDM-TC) Spot**Product code:**

4802

Technical description:

Die-cast aluminium projector with adapter. The optical assembly is separate from the components assembly in order to guarantee optimum operating conditions and efficiency. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis. IP40 for optical assembly.

Installation:

Electrified track application through special adaptor complete with electronic control gear.

Dimension:

249x233 mm

Colour:

White (01)|Grey (15)

Weight [Kg]:

1,2

Mounting:

Three circuit track

Wiring:

Electronic components for discharge lamp contained in special box fixed to the fitting.

Notes:

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
