**Parallel - Projector with electronic control gear 35 W HIT (CDM-TC) Flood****Product code:**

4803

**Technical description:**

Die-cast aluminium projector with adapter. The optical assembly is separate from the components assembly in order to guarantee optimum operating conditions and efficiency. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis. IP40 for optical assembly.

**Installation:**

Electrified track application through special adaptor complete with electronic control gear.

**Dimension:**

249x233 mm

**Colour:**

White (01)|Grey (15)

**Weight [Kg]:**

1,2

**Mounting:**

Three circuit track

**Wiring:**

Electronic components for discharge lamp contained in special box fixed to the fitting.

**Notes:**

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
