Parallel - Projector with dimmable electronic transformer 100 W QT12 Flood**Product code:**

4811

Technical description:

Die-cast aluminium projector with adapter. The optical assembly is separate from the components assembly in order to guarantee optimum operating conditions and efficiency. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis. IP40 for optical assembly.

Installation:

Electrified track application through special adapter complete with concealed dimmable electronic transformer.

Dimension:

142x233mm

Colour:

White (01)|Grey (15)

Mounting:

Three circuit track

Wiring:

Complete with 50W 230V +/-10% dimmable electronic transformer with 50/60 Hz mains frequency.

Notes:

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
