## Parallel - Projector with electronic control gear 70 W HIT-DE Flood

---

**Product code:**

4814

---

**Technical description:**

Die-cast aluminium projector with adapter. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis. IP40 for optical assembly.

---

**Installation:**

Electrified track application through special adaptor complete with electronic control gear.

---

**Dimension:**

284x244mm

---

**Colour:**

White (01)|Grey (15)

---

**Mounting:**

Three circuit track

---

**Wiring:**

Electronic components for discharge lamp contained in special box fixed to the fitting.

---

**Notes:**

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
