Parallel - Projector 150/200/300 W QT-DE Flood

Product code:

4818

Technical description:

Die-cast aluminium projector with adapter. Projectors can be rotated by 90° with respect to the horizontal axis and by 340° with respect to the vertical axis. The angle set can be locked with respect to the vertical axis by means of a mechanical device, while continuous friction allows angle adjustment with respect to the horizontal axis. IP40 for optical assembly.

Installation:

Electrified track application through special adaptor.

Dimension:

213x213 mm

Colour:

White (01)|Grey/Black (74)

Weight [Kg]:

1

Mounting:

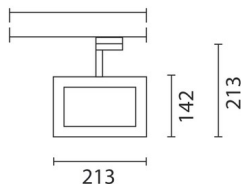

Three circuit track

Wiring:

Electronic components for discharge lamp contained in special box fixed to the fitting.

Notes:

Complete with protection glass. The optical assembly provides quick, easy, tool-free access with the simple pressure of a hand, optimising routine maintenance operations.

Complies with EN605981 and pertinent regulations
