Radial - Up/down light luminaire with electromagnetic wiring 150 W HIT-DE

Product code:

5048

Technical description:

Wall-mounted fitting designed to use metal-halide lamp with up/down-light emission. Provision for auxiliary halogen lamp QT18 - 100W with pre-ignition function. The optical assembly and wall structure are made of cast aluminium subjected to phosphochromate treatment and finished with liquid acrylic paint with high UV resistance. Asymmetric superpure-aluminium internal reflector. The upper transparent hardened soda-lime glass is housed in the assembly with no visible screws. Diffusing lower glass. The control gear components are housed in the wall structure.

Installation:

Wall installation - the installation plate is fixed by means of Fischer screws.

Dimension:

320x100 mm L 419mm

Colour:

Grey (15)

Mounting:

Wall surface

Wiring:

Components for electromagnetic control gear. Mains connection by standard terminal board inside the anchoring base.

Notes:

Designed to accept 100W HAL B15d auxiliary halogen lamp.

Complies with EN605981 and pertinent regulations
