5882

Technical description:

Luminous module with Pixel Plus - in the single version - designed to use metal-halide lamps with spot optic. The fitting is made of aluminium and thermoplastic material. It has professional optics that permit double adjustability, i.e. up to 40° inside and up to 65° outside (continuous friction movement with 355° rotation). The luminous module casing is made of extruded aluminium. The fitting is equipped with retention cables and scratch-resistant springs. The accessories include spill-rings and coloured filters.

Installation:

Application to structural profiles of Minimal/Frame kind (ceiling/suspension). The 4 plastic counter springs make it possible to install the product either flush with the surface or 10 mm inside it with no tools.

Dimension:

600x121 mm h = 116 mm

Colour:

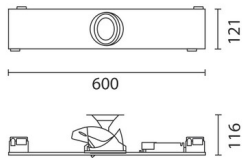

White (01)|Grey (15)

Weight [Kg]:

1,5

Wiring:

Electronic control gear included in the fitting.

Complies with EN605981 and pertinent regulations
