Compact Easy - Small module with flat screen and electronic control gear 4x24 W T16

Product code:

6200

Technical description:

Modular system for use with fluorescent lamps. Recessed installation into false ceilings (IP40) and walls (IP53). The product has: white painted steel sheet body and reflector and an aluminium frame that supports the thermoplastic diffusing screen. Screen has a flat surface. Fitting uses 4 T16 24 W lamps. The screen-frame aluminium group is connected to the body of the fitting with special springs. These springs have a system that prevents the screen-frame group from falling, remaining attached to the body of the product on one side, therefore making maintenance operations quite easy. Electrical connection via terminal box, housed inside the product's body, requires no tools.

Installation:

Installation into all types of 600x600 mm false ceilings with cross-sections between 1 and 40 mm. The hooking and fastening system is performed via steel plate brackets.

Dimension:

596x596mm

Colour:

White (01)

Weight [Kg]:

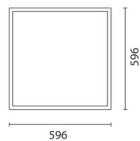

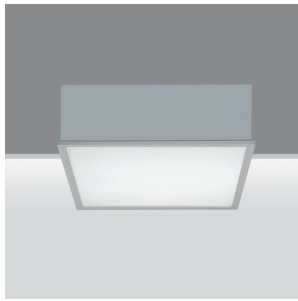

8

Mounting:

Ceiling recessed

Wiring:

Electronic control gear housed within the fitting.

Complies with EN605981 and pertinent regulations
