Trunking system T16 -

Product code:

6975

Technical description:

Double-lamp wired plate designed for T16 light sources. It is made of pre-painted galvanised sheet steel.

Installation:

The plate can be installed into the different structural modules available. The electrical connection to the structural module is carried out by means of connectors having a selector for three separate power-supply lines.

Dimension:

60x45 L=1480 mm

Colour:

White (01)

Wiring:

Complete with electronic control gear with fast connection (mechanical and electrical) system for connection in a continuous row. Thanks to a ¼-turn fitting system no tools are needed to install the plate into the structural module with track.

Complies with EN605981 and pertinent regulations
