MiniNuvola - Optical assembly with diffuser screen 150 W HIT-DE 150 W HST-DE**Product code:**

7740

Technical description:

Indirect lighting system for outdoor settings composed of a pole, a Lingotto projector with the control gear in a separate box from the optical assembly, a diffuser screen made of polyester resin reinforced with fibreglass, and special die-cast aluminium fastening and/or supporting brackets. The cylindrical pole, D= 102 mm, is made of hot galvanised steel.

Installation:

The panel is about 700 mm from the upper part of the optical assembly. The control gear is located beneath the optical assembly.

Dimension:

1200x921 mm

Colour:

Grey (15)

Mounting:

Poletop side entry

Wiring:

Wiring for 150 W Metal halide and Sodium vapour lamps, located inside the component-holding box, comprising ignitor, ballast and capacitors.

Complies with EN605981 and pertinent regulations
