**Linealuce - Module with Xenon lamps 10 x 8.5W 12 V****Product code:**

7869

Technical description:

Modular system for facade lighting with 10x10W xenon lamps. Each module is made up of an extruded aluminium section with diecast aluminium end covers with PG11 fixed with special M4 screws with anti-loss system on special EPDM seals. The optical assembly is provided with a silk-screened tempered glass cover fixed to the extruded aluminium section with silicone and houses the 99.95% superpure aluminium reflector, the steel lampholders and the xenon lamps on a Vetronite plate with nickel plated copper connection ways. The component-holding plate can be extracted for easy maintenance.

Installation:

Installed on walls, ceilings, banisters with special installation elements supplied separately, provided with fast-coupling system without the need of tools.

Dimension:

859x116mm H =57mm

Colour:

Grey (15)

Mounting:

Ceiling surface|Wall surface

Wiring:

External control gear in a thermoplastic box with power supply plate immersed in protective insulation resin. The presence of fast-coupling terminal boards with cover plate in Class II and PG11 for waterproof allows for connecting contiguous modules in cascade.

Notes:

The following accessories are available upon request: longitudinal cut-off 40°/60° louvers, transversal cut-off 40° louvers, anti-glare screens, decorative screens and coloured filters.

Complies with EN605981 and pertinent regulations
