Frame - Large round model 1x75W 12V QR111

Product code:

8875

Technical description:

Downlight designed for use with 75 W L.V. halogen lamps QR111. It is made up of an aluminium sheet shell housing the optical assemblies. The lamp is located on a die-cast aluminium ring directable through technopolymer universal joints (+/- 45° rotation with respect to the vertical and horizontal axes) - also permitting stability of the angling system. The following accessories may be installed: coloured glasses and refractor for an elliptical distribution of the light flow.

Installation:

Recessed fitting: the shell is fixed to the false ceiling (hole diameter: 171 mm) through adjustable brackets on sliders. The perimetric rim also acts as a ledge.

Dimension:

D 179mm H 134mm

Colour:

White (01)|Grey (15)

Weight [Kg]:

0,8

Mounting:

Ceiling recessed

Wiring:

Connection to the secondary of the transformer on terminal blocks located on the upper part of the shell.

Notes:

For the photometric data of the fitting refer to the photometric data of the light sources used.
