Delo - Optic II - Small optical assembly 100 W HST / HIT (CDO-TT)**Product code:**

B160

Technical description:

Cylindrical lighting body made of aluminium treated with epoxy powder paint with orange peel finish. It contains the optical assembly and the wiring unit. Extruded aluminium bracket for pole fixing with 14 mm diam. stainless steel rods. The optical assembly and the wiring unit are protected by means of a frame hinged to the structure, complete with silicone rubber gasket and hardened glass sealed with neoprene gasket. Single-piece optics made in 99.8% superpure aluminium (2 mm thickness) produced using the hydroforming technique with polishing treatment (Alzak) and fixed to the structure with two stainless steel screws. All screws are in stainless steel.

Installation:

Fixed with a bracket on a pole with base plate or buried base. It can also be fixed to the wall with adjustable/fixed bracket.

Dimension:

254mm D=457mm

Colour:

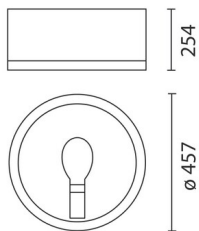

Black (04)|Grey (15)

Mounting:

Poletop side entry

Wiring:

Wiring for discharge lamps on the steel plate contained in the optical assembly.

Complies with EN605981 and pertinent regulations
