Protruding triple-projector pole top, attachment 102 mm -

Product code:

B452

Technical description:

Protruding pole top for triple projector Lavinia for cylindrical pole (diam. 102 mm). The extruded-aluminium (EN AW 6060 T6) coupling is subjected to liquid grey (RAL 9007) painting and is fixed to the pole by 3 bolts placed at 120°. Joint in aluminium alloy EN1706AC 46100LF. The optical assembly is fixed to the pole top by two fixing screws. Two safety bolts make its application easier. This connection system makes it possible to adjust the inclination of the optical assembly with respect to the road surface by $\pm 15^\circ$. All screws are made of stainless steel.

Installation:

The pole top is applied to poles with a diameter of 102 mm

Dimension:

D = 130 mm H = 175 mm

Colour:

Grey (15)

Wiring:

The special pole-top attachment ensures the safe passage of the supply cables and permits application on existing 102-mm-diameter poles with no need for holes.

Complies with EN605981 and pertinent regulations
