Grid - Wall/ceiling-mounted luminaires for continuous emergency lighting 1x26W TC-TEL**Product code:**

B692

Technical description:

Diffused-light luminaire designed to use TC-TEL lamps for emergency operation SA (always on). Emergency operation lasts 1 hour; 12 hours are needed to recharge the batteries. NiCd batteries 3.6V 1.2Ah. It has a die-cast aluminium frame, a protection grid made up of three longitudinal elements, a polycarbonate diffuser and an EPDM perimeter gasket that ensures Protection Degree IP66. The polycarbonate component-holding box comes complete with a polycarbonate protection cover to ensure Insulation Class II. All the fittings in the series are also equipped with a cable clamp PG11 for perfect tightness in the insertion point of the power supply cable. All screws are made of stainless steel (A2).

Installation:

Wall-mounted fitting for emergency operation (SA)

Dimension:

300 x 300mm H = 108mm

Colour:

White (01)|Grey (15)|Black (04)

Weight [Kg]:

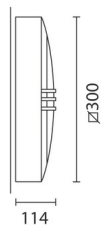

2,7

Mounting:

Wall arm

Wiring:

Built-in electronic ballast.

Complies with EN605981 and pertinent regulations
