

Mito terra table top datasheet

Linear LED table mounted luminaire with double-sided light output and asymmetrical light pattern for linear illumination of tables and double workstations. The luminaire produces wide, glare-free light that projects upwards and downwards. When mounted on a table with a standard height, the luminaire reaches a total height of 220 cm. The luminaire has an automatic mode that is particularly useful in office environments: »ambient light control« measures the ambient light and automatically adjusts the brightness in accordance with the selected settings. The »presence sensor« switches the luminaire on and off depending on whether there is anyone in the room. The luminaire has a plug-in power supply (converter) that allows it to be connected to 230 V AC/50 Hz mains voltage and the head can be removed for maintenance purposes. Power max. 70 W, can be controlled via »touchless control« (gesture control at the head), »body sensor« on the body of the luminaire, »ambient light control« (ambient light sensor at the head), »presence sensor« (motion sensor at the head) or using Occhio air. The sensors »touchless control« + »body sensor«, »ambient light control« and »presence sensor« can be deactivated via the Occhio air app.
