REAL MATTER

Mounting	Wall surface
Lamps description	Low-Power Led: 3W - 200 lm ≠ FIXT 82 lm - 3000K/CRI 80 - 24V
Environment	Indoor, Outdoor
Notes	We recommend using a connection system with a degree of protection greater than or equal to the degree of protection of the luminaire.
Technical description	Body made of stainless steel AISI 316L treated with the PVD process (Physical Vapour Deposition). Thanks to this innovative treatment, after the polishing or brushing process, according to the finishing choice, the surfaces of Real Matter are coated with a thin film of metals such as zirconium and titanium which, combining with the steel at the molecular level, increase the characteristics of resistance to both mechanical and to atmospheric agents, allowing the realization of elegant and durable finishings. UV-stabilized polycarbonate diffuser. The luminaire is provided with two L 200mm outgoing power cables and with a kit for the hermetic IP connection. It is necessary to use an installation box, to be ordered separately. The power feed driver may be installed remotely or housed at the back of the luminaire in the remote housing.
