The rigid LED spotlight MINI FRAME LED is made from a symbiosis of plastic and glass and is the LED lighting solution for applications where accent lighting and low installation depths are required. The 1W Power LED, available in either blue, pure or warmwhite light colour, provides the necessary illumination intensity. For operation a suitable, toroidal transformer providing 12V alternating current is required. This luminaire contains built-in LED lamps. EEK: A - A++. The lamps cannot be changed in the luminaire.
