The extensive high-voltage pendant luminaire WHEEL PC is made from high-quality materials, ensuring homogeneous illumination attributes of the used T8 ring tube. In addition to the general source, three ES111 lampholders are placed within the shade ensuring adjustability and individual accent illumination. Thanks to the already incorporated electronic ballast, WHEEL PC is ready for direct connection to 230V mains supply. This luminaire is compatible with bulbs of the energy classes: A - A / E - A++
