The THEO UP/DOWN wall luminaire is made from aluminum and equipped with a glass that covers the lamp. Thanks to the position of the two incorporated lampholders, the installed high-voltage halogen lamp with GU10 socket produces two equal but oppositely arranged light beams (UP/DOWN). Available in different colour versions, the electrical connection of THEO UP/DOWN is made directly to 230V mains supply. This luminaire is compatible with bulbs of the energy classes: E - A++
