The low-voltage recessed wall and ceiling luminaire AIXLIGHT MOD is equipped with gimbal-mounted lampholders and designed for the use of low-voltage MR16 halogen lamps. The inner side of housing made from aluminum and steel is painted black, providing a look of levitating lamp heads. The silvergrey frame visually completes the AIXLIGHT MOD. A suitable transformer providing 12V alternating current is required for operation. This luminaire is compatible with bulbs of the energy classes: C - A+
