The CYGNIS PD-1 pendant offers a warm white LED light with excellent illumination properties in addition to its minimalistic design. The luminaire's four, built-in LED modules deliver a pleasantly warm lighting experience. The total power consumption of approx. 30 Watts only also shows its excellent energy efficiency. With a wide beam angle and a luminous flux of approx. 2100 lumens and high colour rendering (CRI90), you can use it as a background lighting element above dining tables, desks or similar objects in the decorative living area without any problems. The CYGNIS PD-1 pendant comes in white and silver-grey. Thanks to its built-in dimmable LED converter (dimmable 1-10v) and the 2 m pendant suspension, the luminaire is delivered so that it can be directly connected to the 230V mains supply:
