Walkable, low-voltage recessed ground luminaire with round cover and partially satined glass. Rated IP67, it is suitable for outdoor use. To ensure accurate illumination, the lamp is adjustable. The electrical connection is made directly to 230V mains supply via a separately available transformer providing 12V alternating current. For simplified mounting, an installation housing is included offering through-wiring possibilities. We optionally offer a stainless steel or partially satined glass cover. This luminaire is compatible with bulbs of the energy classes: C - A+
