The OUT BEAM series LED wall light, available in single-headed and double-headed versions, was designed especially as an architectural accent illumination. The LED light sources lie opposite each other and are covered by glass, they produce a narrow and a wide beam respectively and thus create the special up/down effect. Thanks to its IP44 protection class, the luminaire is suitable for outdoor use. The electrical connection of the luminaire is made directly to the 230V mains supply thanks to the built-in LED driver. The OUT BEAM series also includes wall lights for halogen lamps.
