Le Perroquet - Projector with 90/100 W QT 12 electromagnetic transformer

Product code:

4920

Technical description:

Die-cast aluminium and thermoplastic projector with adapter. It can be rotated by 360° with respect to the vertical axis and inclined by 10° upwards and 90° downwards. Mechanical locking devices, graduated scales and adjustable friction devices guarantee the precise positioning of the light beam. The projector is equipped with a die-cast aluminium base for ceiling application. The luminaire is provided with a set of diaphragms for the emission of circular light beams and can have an optional set of adjustable diaphragms for shaping the light beam itself. All pointing, focusing and routine maintenance operations can be performed without the use of special tools. The luminaire is designed to be used with accessories, such as glass and metal gobos and coloured filters.

Installation:

Fitted to the ceiling by means of a base.

Dimension:

D=132 mm H=317 mm L=409/500 mm

Colour:

White (01)|Grey (15)

Weight [Kg]:

4,3

Mounting:

Ceiling surface

Wiring:

Complete with electromagnetic transformer for 90/100W 12V halogen lamps, fitted inside the luminaire.

Complies with EN605981 and pertinent regulations
