Bespoke - Halogen spotlight complete with electronic transformer**Product code:**

M802

Technical description:

Element for accent lighting set up to use an ultra low voltage dichroic halogen lamp. Die-cast aluminium lamp holder assembly, joints and arms. Shaped sheet steel transformer container base. Steel fixing springs. Available with separate code: anti-glare screen (code MWPO) which allows insertion of optional glass.

Installation:

Mechanical fixing on the structural section using steel springs. The kit can be freely positioned along the channel installed, irrespective of whether the opening is open 100 or open 180, observing a centre-to-centre distance of 350 mm between spotlights. We advise against installing spotlight kits and fluorescent modules on the same side of the channel.

Dimension:

200mmx91mm

Colour:

White (01)|Black (04)

Mounting:

Ceiling surface

Wiring:

The kit comes complete with an electronic transformer in the base. Set up for through wiring with quick coupling in and out connectors. The pack includes a pair of connectors which can be used for connections between kits positioned at a distance (electric cable not supplied). For power supply connections the plate with terminal block is available, code MWQ0.

Complies with EN605981 and pertinent regulations
