

Random Solo,  
Design by Chia-Ying Lee

Model Random Solo 23

Five perfect spheres floating in the air like gentle glass bubbles. Designed by Chia-Ying Lee, Random Solo revisits the concept of the Random suspension lamp by parting the original three-piece cluster and adding two new blown glass spheres.

The five sizes and six different finishes available offer ample styling freedom, both as individually suspended light points and in light and lively combinations on clusters. The new fingerprint resistant *frosted white* finish magically changes the perception of the sphere and its volume, opening new opportunities for interior decoration.
