

STOVE LED GI

A fixture which is both sleek and playful. Its name wasn't chosen at random: from below, you can clearly see the outline of a stove, with the asymmetric foot as the flue. Stove is the result of pure geometry and has been perfected down to the smallest detail. Although the lamp has robust, clearly defined lines that do not merge into each other, it still retains a perfect balance. The unusual thing about Stove is the two pivot points which make this spotlight a particularly versatile and highly directional light source. Designed by Couvreur & Devos.
