

## **GEORGE IP54 GU10**

Outdoor butler George creates an atmospheric, indirect light which emanates from the upper housing and glides along the inside. Colourful or plain? The options are endless and despite its robust cylinder shape, there is something light about George. This is because of the recessed base, which makes George look like it is floating. Finally, George does not mind the rain: thanks to the rounded top, all water simply flows down this light fitting. Designed by Rotorgroup.
