

WAVE

LIGHTING | Indoor
FEDERICO PERI

The Wave collection, designed by Federico Peri, reimagines lighting through an unexpected lens: the understated architecture of Tibetan suspension bridges. This inspiration takes form in luminous pieces that appear to float effortlessly in space—weightless in spirit, yet visually arresting in their sculptural presence. Each tubular LED lamp defines its surroundings, whether positioned on the wall or resting on the floor, creating a sophisticated lighting atmosphere for living rooms and studio spaces. Wave's materiality is born from the encounter between seemingly contrasting elements: the leather-wrapped tube brings a sense of tactile warmth, while the faceted glass diffuser captures and refracts light into a gentle, enveloping radiance. To complete the collection, the table version of Wave reinterprets the curved geometry in a compact, cocoon-like form. Here, the light source is veiled by a structure that alternates between solid surfaces and translucent openings, giving rise to a point of light that is vibrant and ever-

shifting. The interplay between soft textures and luminous detail adds depth, transforming the lamp into a refined and dynamic presence within the interior landscape.

Model: lamp with LED light source. Assembly required (appliques only).

Structure: lamp bodies with structure in leather-covered tubular aluminum.

Glass diffuser.

Leather-covered connecting tape with matching stitching (hanging lamp only).

Decoration: caps and details in material of choice.

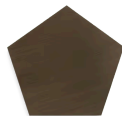

Specify the chosen dimmeration in the order.
