

LBS

Wall with indirect diffuser

code LB201.8

PRODUCT DESCRIPTION

LBS is a thin band of extruded aluminium section and it is possible to install it in many different ways. It consists of basic modules and, depending on the way they are assembled, it can be arch shaped (to be installed on a wall), circular shaped (to create swinging, ceiling and trimless recessed fixtures) or it may have a curving shape (to form a band which twists and turns on the ceiling, for instance). The extruded part, representing its body, is drawn in such a way to be able to house the linear LED light source, shaded with a white opal diffuser, both on the inside vertical side and therefore to give out light on its horizontal axis, and on its narrower and horizontal side and consequently to give out light on its vertical axis (indirect one). It is also available in ceiling, pendant and trimless recessed version with diffused direct light emission. Additionally, LBS also allows to make use of directional projectors, that can be hooked and wired to the profile.

PRODUCT FEATURES

Mounting method	wall
Wattage	1x17W
Color rendering index	>80
Finishing	white / black
Source luminous flux	2200lm
Diffuser	opal polycarbonate
Luminous flux	1636 lm
Fitting efficiency	96 lm/W
Ballast	not included
Energy efficiency class	A+
Dimension	120 H 90 MM L 950 MM
Grado IP	IP40
	No

To be completed with power supply to be installed in a remote junction box
