

Small, fine, elegant and discreet - The ACAMAR is a light manufactured from high-quality aluminium. The colour reproduction value is over 90, which means high colour authenticity. The design is chic and attractive thanks to its curvature on one side. You can mount the light with the curvature upwards or downwards, depending on your preference. The white paint inside accentuates the warm white light and ensures pleasant scattering upwards and downwards. The outside is highly polished for an incredible shine.
