Materials

ABS

ABS is a thermoplastic techno-polymer that, once stabilised, resists well even against UV radiation and can therefore be used outside. It has strong mechanical features even at low temperatures and has high strength, impact and scratch resistance. These features make it ideal for use in a range of sectors, including furnishing.

Maintenance: Clean the product with a soft, damp cloth. Use neutral detergents, if possible diluted in water. Do not use detergents containing alcohol, trichloroethylene, ammonia or other solvents, even in small quantities.
